### DETAILED ACTION

1. Claims 1-3 and 5-10 are pending in the application.
2. Applicants' amendments, filed 7/15/04, have been considered. However the 35 USC 112, second paragraph rejection is still maintained.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-3 and 5-10 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicants regard as the invention. Applicants have claimed, in independent claims 1 and 7-10, a process for producing an aromatic compound isomer.... However, applicants have not disclosed any process steps, which describe how to make the said aromatic compound isomer. From applicants claim language, it appears that applicants are separating/purifying an aromatic compound via adsorptive separation. However, there are no delineated steps describing how the aromatic compound isomer is separated from other mixture components (assuming there are other components in the starting mixture besides the aromatic compound and a solvent) and how the aromatic compound is removed from the adsorbent to recover the said aromatic compound now separated from the mixture components. Applicants' claim language appears to be more concerned with purifying the desorbent. Thus, it is unclear what applicants actually intend to claim.

***Response to Arguments***

Applicants' arguments filed 7/15/04 have been fully considered but they are not persuasive.

Applicants argue that the amended claims are now in proper method form because independent claims 1 and 7-10 now recite the affirmative step of "subjecting the starting mixture containing the aromatic compound isomer to adsorptive separation by the use of a zeolite...".

This argument is not convincing because the above recitation still does not fully describe how the aromatic compound isomer is separated from other mixture components (assuming there are other components in the starting mixture besides the aromatic compound and a solvent) and how the aromatic compound is removed from the adsorbent to recover the said aromatic compound now separated from the mixture components.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of
